

Grouper

grouping bread and loafs

GROUPER

The Danmatic Grouper is an efficient and convenient way to group bread and loafs

The Danmatic Grouper efficiently arranges freshly baked bread/loafs from either a single or dual production line into convenient groupings of 2x4, 3x6, or 4x4 configurations.

These groupings serve various purposes, such as slicing, packing, cooling, or any other specific requirements for product grouping.

Additionally, the Danmatic Grouper can also group loose tins or straps with complete automation, ensuring versatile and efficient grouping options for your production needs.

GROUPER

2x4, 3x6, or 4x4 configurations

Benefits

- Significant increase in efficiency – employee saving
- Ergonomic working conditions for personnel
- Long operational life and stability due to its robust stainless steel design.
- Designed for continuous operation 24/7
- Cleaning reduced to a minimum

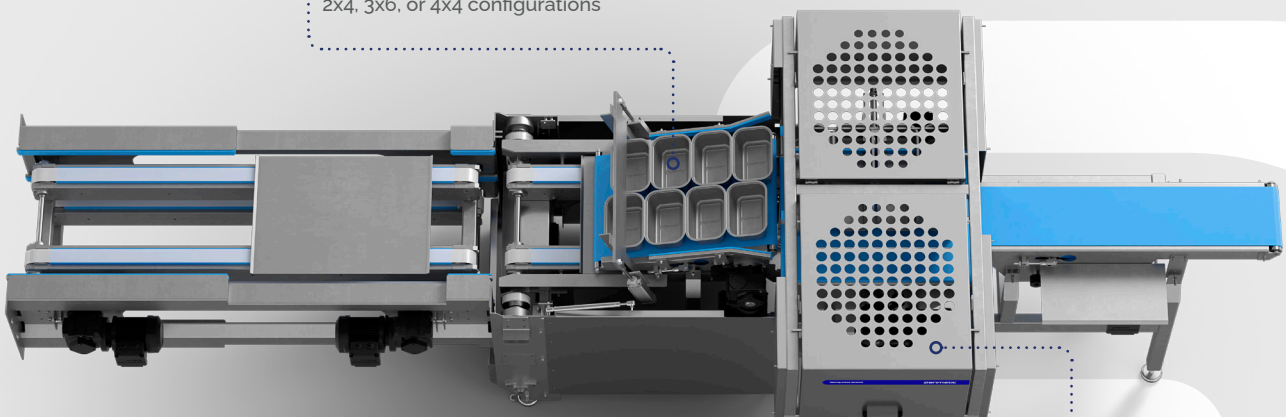

Technical data

- Fast and efficient
